| A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). |                                    |                        |         |  |  |  |  |

#### **DETAILED ACTION**

## Continued Examination Under 37 CFR 1.114

- 1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 8, 2005 has been entered.
- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

# Claim Rejections - 35 USC § 102

3. Claims 1, 5, 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Bartley et al. (3,722,469).

Bartley discloses a nozzle unit comprising: a distribution canal network 8, 10, 12, 14, 16, 18, 21; nozzles 26; compensation canal 19 (19a-19d).

Any manifold type distribution connection having more than two outlets would constitute a compensation canal between any two of the outlets from the manifold.

4. Claims 1, 4 and 7 rejected under 35 U.S.C. 102(b) as being anticipated by Owen (753,730).

Art Unit: 3752

Owen discloses a nozzle unit comprising: a distribution canal network N, H, E, E', K, A (the portion of A connecting E' and A' to the first down stream set of nozzles); nozzles C; a valve F; compensation canal (portion of A between the first set of nozzles downstream of E' and A', i.e. the portion of A next to reference letter D in figure 1).

## Allowable Subject Matter

5. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

## Response to Arguments

6. Applicant's arguments filed July 8, 2005 have been fully considered but they are not persuasive.

Regarding Bartley, it appears that applicant is arguing that the manifolds 19a, 19b, 19c and 19d are not connected to each other, and therefore, it does not discloses a compensation canal. Applicant's claimed invention does not require such to be the case. In Bartley, canal 12 to canal 21 is one zone, canal 14 to canal 21 is another zone, etc.

Applicant argues that Owen only teaches a single division. Owen teaches a first division from N to E and K, a second division form E' to A, and a third division from K to A.

Application/Control Number: 10/749,866

Art Unit: 3752

Applicant argues that Owen fails to teach a compensation canal. See the rejection paragraph above.

### Conclusion

7. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher S. Kim whose telephone number is (571)

Art Unit: 3752

272-4905. The examiner can normally be reached on Monday - Thursday, 6:30 AM -5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Scherbel can be reached on (571) 272-4919. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
